

IN THE ABSTRACT:

Please amend the Abstract of the Disclosure as follows:

B1
The invention relates to a method intended to automatically create a description of a video sequence-i.e. its table of contents- by ~~means of an analysis of said sequence~~ **analyzing the video sequence**. ~~The main step of said method~~ **First is a** temporal segmentation of the video shots of the sequence, using camera motion parameters. This segmentation uses a similarity criterion involving, for sub-entities of each shot, the level of homogeneity of these sub-entities on the motion parameters of the camera used to acquire the original images and generate the bitstream constituting the processed sequence.
